

## User Story :

My project is to building a social network for developer to talk and ask for help from another programmers or to share his opinion or his own project. In this web application user must sign up or login to create his profile.

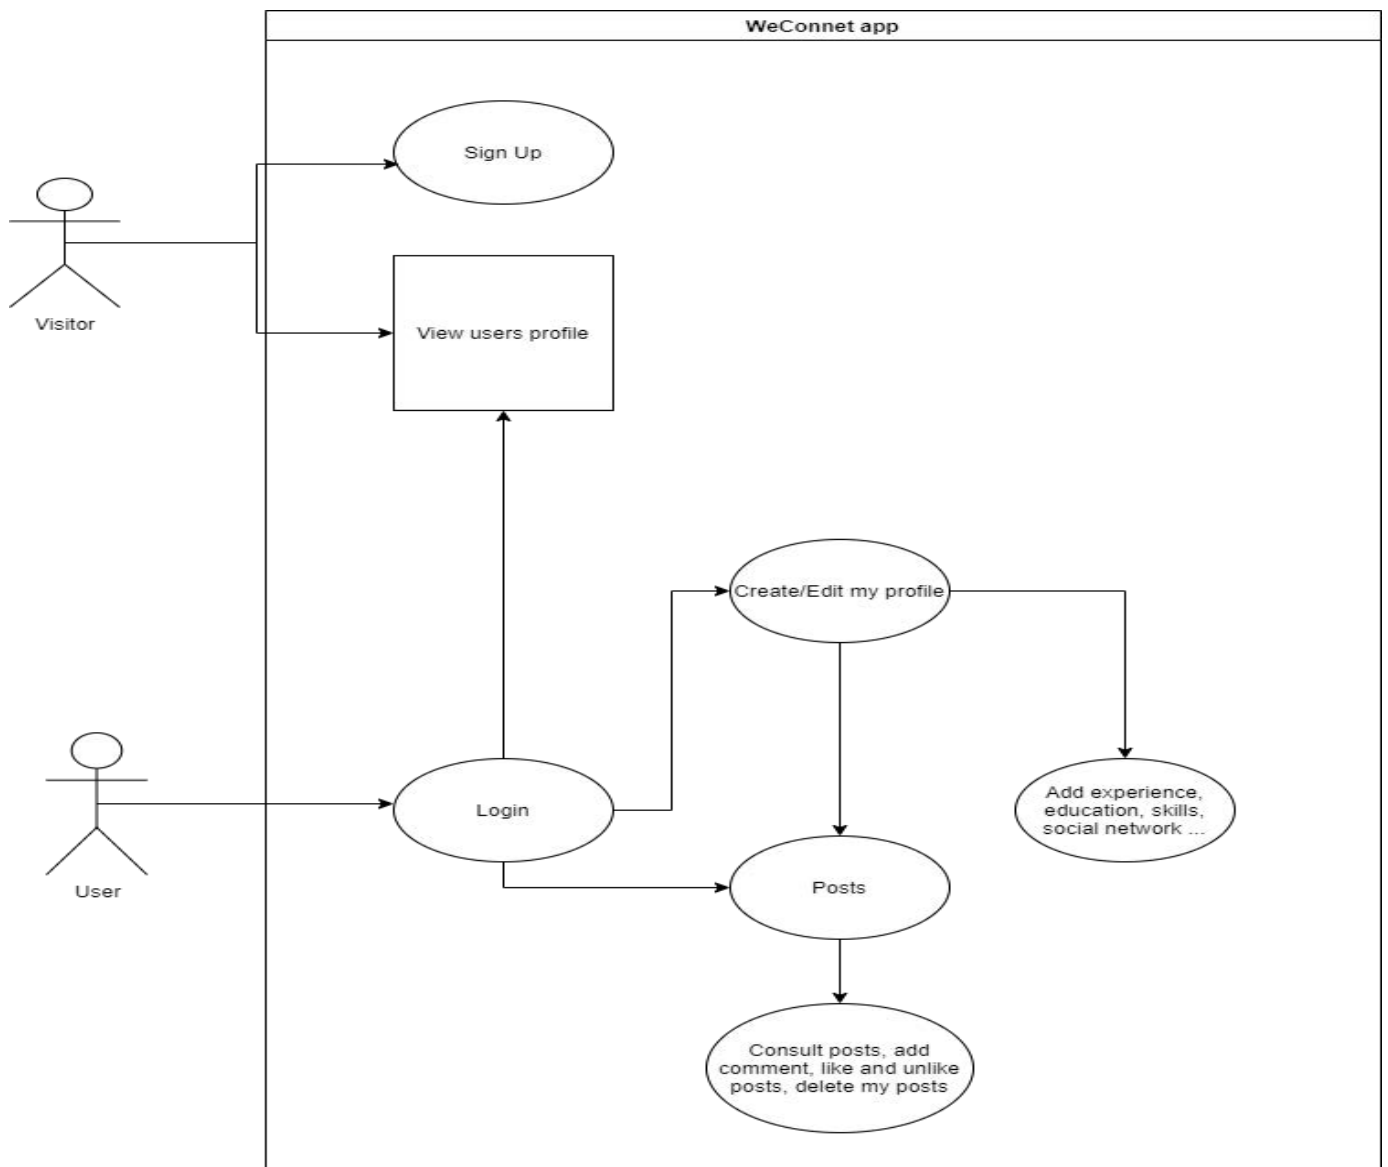

### **As a visitor I need to:**

- View developers profiles.
- Sign up.

### **As a registered user I need to:**

- Create my own profile .
- Add my information (education, experience).
- Edit my profile(status, my company name, my web site, location, skills, bio, my social network ) or delete it.
- Add Github Repos.
- Add/Modify/Delete/consult my post.
- Like and unlike posts.
- Delete my post.
- Comment posts.
